CAREER OBJECTIVE

As a Full Stack Developer, I have to design and code not just the backend databases and APIs but also the frontend UI. I have already worked on many Full Stack Web apps and gained experience in developing and deploying Web Apps online. Currently I'm aiming to secure a position as a Junior Developer and work on a team of skilled Developers to sharpen my skills as well as learn to work under pressure. My aim is to be a Senior Developer of an organization which can facilitate a dynamic workplace and deals with large data intensive projects.

PROJECTS

1. Online Result Processing and Management System.

- A Web App that facilitates accounts and profiles for Teachers, Students and Administrative employees for performing their dedicated tasks and receive services. This system takes in raw result data from teachers for processing and outputs a complete result for the entire University, which the students can see anytime from their accounts. The system can process, store and publish results for all Departments of an University.

Tech stack used: **Backend:** Node.JS, Express, SequelizeORM, Passport.JS. **Database:** PostgreSQL*/MySQL.

Frontend: Templating engine using Pug/Jade(HTML), CSS, JS.
